Simple and Convenient Administration

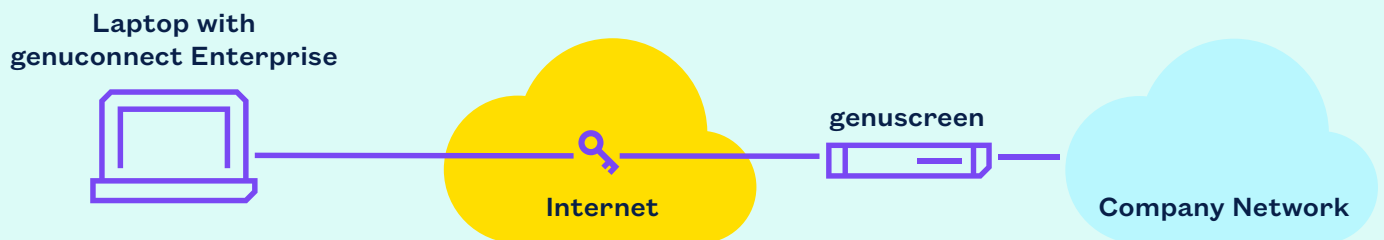

genuconnect Enterprise is characterized by interoperability with hard disk encryption, device control, and endpoint protection. It is compatible with the Microsoft ecosystem, which simplifies the installation, configuration, uninstallation, and updates.

Designed for laptops and tablets with Microsoft 10 or 11, the VPN Software Client uses the existing Microsoft security functions. Its unique IT security architecture is based on proven IPsec technology with multi-factor authentication.

Scalable and Backend Friendly

genuconnect Enterprise stands for requirement-based security from a single provider. The solution scales easily for infrastructures with more than 100,000 VPN clients.

Would you like to enable highly secure connections in classified networks in the future? Changing from genuconnect Enterprise to genuconnect is possible without additional hardware or backend readjustment. All you need to switch is the approved VPN Software Client genuconnect and a smart card.

genuconnect Enterprise securely connects mobile Windows devices to your company network

Reasons Why

- Experts for the IT security of companies and public organizations
